

Fork mud scraper kit

Developed to reduce seal contamination under severe conditions

Available applications:

Developed for the most demanding off-road and racing motorcycle forks.

The mud scraper kit for motorcycle forks from SKF consists of a pair of ready to fit scrapers made with a new, smart design and with a low friction plastic material.

SKF advantages:

- Reduced wear
- Increased fork seals life and performance
- Effectively cleans dried mud from the stanchion
- Enhanced water and dirt protection
- Withstands UV light
- Low and constant friction
- User friendly assembly, can be installed “in-field” without fork or wheel removal
- Enhanced performance of the fork due to reduced contamination seen by the fork seals

The design characteristics of the mud scraper kit promote dynamic sealing abilities:

- The kit comprises two mud scrapers and stainless steel assembly pins plus spares
- Under extremely muddy conditions, the mud scraper prevents dirt entering the fork and enhances the performance of the other fork components
- Special features to ensure that contamination is not retained within the system

Developed to specific customer requirements, these scrapers are designed

- to operate with a long stroke and at high speed
- to withstand heavy contamination
- for easy assembly when needed for muddy conditions
- for easy removal (and later re-use) when the contamination is not severe
